RE: Feather Lab Case #190221.1; possible drone strike

Dear Ms. Lamm,

On 21 February 2019, one samples was received from a damaged area of a radome as a result of a potential drone strike (DCA19WA044).

The sample was submitted for DNA analysis and microscopic examination. No bird DNA or feathers were found in any of the samples.

Good luck with your investigation, if you have any further questions please let us know.

Sincerely,

A handwritten signature in black ink, which appears to read "Carla J. Dove". The signature is written over a black rectangular redaction box.

Carla J. Dove, Ph.D.
